## SENTENCES IMPOSED IN THE UNITED STATES COURT

**LEWIS FREEMAN, FOR HAVING  
COUNTERFEIT MOLDS IN HIS  
POSSESSION, WILL SERVE TWO  
YEARS AND PAY A \$1,000 FINE.**

Many sentences were imposed in the United States court yesterday morning. Judge Charles Swayne presiding. Two cases were also tried, but both resulted in mistrials. These were A. Lewis, charged with peonage, and David Bryan, charged with illicit distilling.

Lewis Freeman, who was charged with having in his possession molds used for the purpose of making counterfeit money, entered a plea of guilty. He was sentenced to serve a term of two years in the federal prison at Atlanta and to pay a fine of \$1,000. Freeman is the negro who was arrested here several weeks ago by Marshal Schach on the charge of being a government prisoner, who had escaped from a general military prison in California, and who had murdered a woman in the Philippines, while serving as a soldier in the army. He had also served in the navy, and secured his release from prison by printing and forging orders of discharge. It was later found that he was one of several who were operating in the distribution of counterfeit money, and when a search was made quite a number of plaster paris molds were found secreted in a house which he occupied.

John P. Werres, a marine, was sentenced to serve four years in the reform school, having been convicted of forgery in securing a number of money orders and other valuables from the Warrington postoffice.

W. N. Barker pleaded guilty to the charge of selling liquor without a license, and was sentenced to serve 30 days in the Washington county jail.

Jas. Minnie, for illicit distilling was sentenced to serve three months in the Calhoun county jail.

William Williams, Julius Ash and Henry Jones, for illicit distilling, were each sentenced to serve three months in the Calhoun county jail.

The grand jury, which has been in session during the week presented its final return, and the members were discharged. No recommendations were made, but out of twenty-eight cases investigated twenty indictments were returned.

## MR. WELLES AND THE WORKINGMAN

"BAD AX" ASKS SOME PERTINENT  
QUESTIONS REGARDING MAY-  
OR'S LABOR RECORD.

Editor Pensacola Journal:

I notice a piece in the Daily News headed "Who Built Our City," by "Old Citizen." I agree with him in every respect, but one and that is in regard to the labor question. I shall ask "Old Citizen" if he is aware that there was once a ship carpenter and calkers organization in this place, and if they didn't ask Mr. Welles for a raise to fair pay for a day's labor, and if Mr. Welles didn't refuse and send off to Jacksonville and get the darkest kind of scab laborers to take the places of those in Pensacola?

In regard to the fishermen's strike, or lockout, as I am informed, the only reason they were not run out of the city to seek employment elsewhere was because he couldn't get others anywhere else to take their places, as every one in this city knows.

Now Mr. Welles wants to know why any laboring man should vote for Bliss. Welles has proved how much love he has for the laboring man or union labor. We have this to prove on Bliss yet.

**Chamberlain's Cough Remedy the Best**

"I have been using Chamberlain's Cough Remedy and want to say that it is the best cough medicine I have ever taken," says Geo. L. Chubb, a merchant of Harlem, Mich. There is no question about its being the best, as it will cure a cough or cold in less time than any other treatment. It should always be kept in the house ready for instant use, for a cold can be cured in much less time when promptly treated. For sale by all druggists.

**The Acrobatic Gibbon.**

A great ape which makes its home in Borneo is the gibbon, which is a small animal compared with the orang, weighing only about forty or fifty pounds. It is very frail in its bodily makeup. The head is set squarely on the shoulders, and it looks upward. When walking on the ground it balances itself along like a walker on a tight rope. Its remarkable power of grasp and dexterity in using its hands are equally with the shape of its cranial indexes of its superior intelligence, perhaps because it is able to take hold of a greater number of things and examine them. The gibbons go in droves, whereas orangs live by families, and one of the most interesting spectacles imaginable is to see a troop of them crossing a great gap in the forest by throwing themselves in succession through the air, each one taking a swing or two to gather momentum before launching himself. So great is their agility that in executing feats of this sort they seem like birds.

**A Cordial Welcome.**

The first demand that the association in charge of New York foundlings had to meet was for a baby girl between one and two years of age with blue eyes, curly hair, dimple in chin, etc. A number of hospitals and asylums were canvassed, and finally Randall's Island produced a sole survivor eight months old who had a number of the requisite traits. The candidate was visited and pronounced worthy, the home up the river found to be all that could be desired, and on a stated afternoon the agent took the train with her charge. As she alighted at the station she noticed an unusual gathering of people, which was promptly explained by a shout: "There she is! There is Mrs. Blank's baby!" The entire village had gathered to offer a welcome. Every body's Magazine.

## SILENT SUFFERERS MODEST WOMEN SUFFER IN SILENCE RATHER THAN CONSULT A PHYSICIAN.

A sense of modesty frequently prevents women who are really sick and suffering from seeking the aid of a physician. They do not even care to consult their family doctor. They know that they are sick; that their periods are painful; that in all probability they are suffering from ovarian troubles, or that they have those dragging pains which always point to prolapsus or falling of the womb. They know they need help, yet do not know how to obtain it.

To such we speak in candor and in honesty. G. F. P. (Gerstle's Female Panacea) will positively cure all such conditions, no matter of how long standing or how stubborn.

This is gospel truth, attested and proved by the grateful testimony of thousands of women who have been rescued from lives of sickness and sorrow by G. F. P.

"Ah!" you say, "but perhaps it won't do any particular good in my case."

Well, try it at our expense. Buy a bottle from your druggist, or if he can not supply you, send \$1.00 to the Gerstle Medicine Co., Chattanooga, Tenn., and they will send it prepaid. Take it as directed and when the bottle is finished, if you can conscientiously say you have not been benefited your money will be returned instantly by the man from whom you bought it.

This is a very different proposition from paying your physician large fees, whether he helps you or not.

If you think your case presents any unusual conditions demanding special treatment and you would like advice, write to the Ladies' Health Club, care of Gerstle Medicine Co., Chattanooga, Tenn., and your letter will be answered by sympathetic women who have your welfare at heart.

**How the Nutmeg Grows.**

"A nutmeg tree," said the gardener, "looks like a laurel. The nutmeg tree begins to bear at the age of ten years. It keeps on bearing until it is ninety. The fruit resembles an apricot, and when ripe it bursts open, showing at its heart the black nutmeg inclosed in a network of scarlet. The nutmeg after plucking must be dried. It is dried over a slow fire, and the process is tedious. It often occupies two months. Before shipping the nutmegs are always steeped in sea water and lime. This is to protect them from insects. They have nothing but insects to fear. In an insect proof condition they keep well, they keep practically forever."

—Minnesota Journal.

107 SOUTH PALAFOX STREET  
PENSACOLA

## CLERKS WANT HALF HOLIDAY

MANY OF THEM THINK THAT LOCAL MERCHANTS SHOULD FOLLOW MOBILE IN THIS RESPECT.

The clerks in the various stores of the city would like very much to see their employers follow the example set by the merchants of Mobile. The latter have about decided to give the clerks a half holiday each week, in order that they may enjoy themselves for a few hours and have some recreation.

The local clerks are talking about the matter, and it is probable that they will ask for this holiday. In Mobile it has about been decided to close all stores at 1 o'clock Friday afternoon, and allow the clerks to spend the afternoon as they may choose. A petition has been circulated there among the merchants, and so far they have secured seventy-nine signers to the agreement. The ladies of Mobile have taken a prominent part in securing signers.

The Pensacola clerks work as long each day as those of Mobile, and they believe that if the movement is properly started that it will be a success.

**Blue Ribbon Lemon and Vanilla**

rightly used are the most economical extracts on the market. Your money back if they fail to please.

**French Mothers.**

There is one thing that French mothers do not do enough. That is to separate from their growing boys, to send them to the school of life outside the home and into situations where they must look after themselves. The mother's happiness is completely only with her children around her. Let life not keep them too much apart. From this arise too fearsome ideas of distance and a too timid attachment to the natal soil or the maternal city.

The difficulty is that it is very reluctantly admitted among the French that the time must come for the nestling to use its own wings. I have seen most excellent parents worry themselves nearly to death because a daughter will not acquiesce in their ideas or wish to accept the husband of their choice. To a son or a daughter very devoted but independent it is often said, "You love me no longer."

But if we have touched here upon a somewhat delicate point the good will and love of the French mothers are above all praise, even if sometimes farthestness and breadth of mind be somewhat lacking.—Charles Wagner in Cosmopolitan.

**Queer Hatching Processes.**

The Chilean frog, known also as Darwin's frog, is unique in its method of hatching eggs. The female is not abnormal, but the male has a large pouch which underlies its whole body and is connected with its mouth by two openings, one on either side of its tongue. When his mate has laid her eggs this devoted parent takes them into his forepaws and places them inside his mouth, whence they presently pass by the two passages into the expectant pouch. Here they remain in warm and safe seclusion until they are hatched and emerge as newborn tadpoles to the light. The breeding habits of the midwife frog are not less singular. He winds the strings of new laid eggs round his hind legs and vanishes into a convenient hole till they are hatched. The Surinam toad places eggs one by one in hexagonal cells formed in the back of the mother toad, whence in due time they hop out, not tadpoles, but perfect toads.

**An Easy Problem.**

A man wanted a ticket to Olathe and had only a two dollar bill. It required \$3 to get the ticket. He took the two dollar bill to a pawnshop and pawned it for \$1.50. On his way back to the station he met a friend, to whom he sold the pawn ticket for \$1.50. That gave him \$3. Now, who's out that dollar?—Kansas City Star.

## LITTLE HADES IN COLORADO

MOUNTAIN THAT HAS BEEN  
BURNING FOR GENERATIONS  
MAY SOMEDAY EX-  
PLODE.

Special to The Journal.

New Castle, Colo., May 12.—Away over in the western half of Colorado, a dozen miles from New Castle, is a mountain which lacks only a Dante-esque setting to make of it a worthy entrance into Hades. It is called by residents and strangers alike the "Burning Mountain," and no other name has ever been found or applied within the life of several generations.

Some say it was set on fire by the Indians two score of years ago, and others that it caught fire through a coal mine which was once worked there. But just how the Indians could have set a mountain on fire five hundred feet under ground, or how it might have caught from a coal mine when that mine is separated from the fire by a thick stratum of vertical stone, are matters for mere conjecture. That the mountain is burning every sense of the visitor who gets within a mile of the place will testify.

On nearly every side of the great hill are evidences of intense destruction. At one point tons upon tons of rock have tumbled into the yawning throat of the huge crater some 300 feet above the base of the mountain, to be burned to finest powder in the intense heat of an abyss of fire. A vast area of the mountain side above the crater is torn into flame tongued scars. The fumes of sulphur are everywhere. All vegetation is dead. Every few weeks, as the combustible substances beneath are consumed the law of gravitation asserts itself and great bodies of rock come crashing down into the fiery furnace to be slaked and crushed by the next succeeding conflagration.

The cracks in the mountain side are in some cases a dozen feet across. The heat from them is almost unbearable at a distance of a hundred feet, and it is impossible to hold the hand in any of the smaller crevices for more than a few seconds.

At night, from below, the countless fissures look like campfires dotting an otherwise barren waste, but when a view is obtained from the top of other mountains they glow like angry inflamed wounds. Blue streaks of flame shoot across them and vanish. Occasionally there is an accumulation of gas which ignites and fills the entire fissure with a blinding glare of uncanal light while a rumbling roar beneath tells of another rock mass dislodged and tumbled into some raging furnace still further below. A roaring, rushing sound not unlike the draft of some huge house furnace is always heard, and an everlasting mist of sulphur smoke hangs over the whole of the great hill.

The Rio Grande river, whose waters at that point flow with quiet ease seldom found in mountain streams, runs past just at the base of the mountain, and there are those who predict that some day, in the process of gradual disintegration, fire and water will meet. When that time comes a big black hole in the ground will take the place of the Burning Mountain, and all the surrounding country for several miles will be buried under a hail of rock that nothing can withstand.

**Uses For Fishskin.**

The serrated spines of the rayfish are used by the Indians of the Amazon to arm their arrows. Sharks' teeth are used in arming weapons, while the teeth of this and other species are used as trinkets by many peoples. The jaws of the sleeper shark are used for head-dresses by certain of our Indian tribes. The vertebrae of the sharks are also prepared as canes. In Japan the bones of sharks and skates are used in making imitation tortoise shell. In Europe and this country shark and ray skins are employed to smooth and polish substances, while the skin of the thornback is employed by cabinet makers in lieu of sandpaper, than which it is very much more durable. Woodworkers also use the rough skin of the blue dogfish like emery paper for smoothing their work and preparing it for polishing.

In India the jawbone of the bovine fish is employed by the natives about Dacca. The teeth, being small, recurved and closely set, act as a fine comb for carding cotton in removing the loose and coarse fibers and all extraneous matters from the cotton wool.

**Not Her Custom.**

She—And she is to be married for the third time! She hasn't been a widow very long. He—No. She never is a widow very long.—New York Press.

**Good Work**

Done Daily in Pensacola—Many Citizens Tell of It.

Nearly every reader has heard of Doan's Kidney Pills. Their good work in Pensacola still continues, and our citizens are constantly adding endorsement by public testimony. No better proof of merit can be had than the experience of friends and neighbors. Read this case:

Mrs. F. B. Albert, living at 303 East Belmont street, says: "My mother has used several boxes of Doan's Kidney Pills which she procured at Sidney Kahn's drug store, No. 9 South Palafox street. She values them very highly. She has suffered severely from her kidneys and back for years. Doan's Kidney Pills have relieved her of the backache and made her kidneys stronger and better in every way than they have been in many years."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—Doan's—and take no other.
